Document Template Management

This procedure defines how reusable document templates are officially registered, tracked, stored, updated, and monitored within Yempo.

This process ensures that templates are:

- centrally stored in the official repository
- traceable through a standardized tracking library
- assigned unique Template IDs
- monitored for updates and usage status
- consistently maintained and reviewed

Department owners or process owners are responsible for creating and updating the content of their templates based on operational needs.

The Technical Writer supports the process by officially registering the templates, assigning tracking IDs, and maintaining their records within the repository and AirTable library.

Template Registration Request and Tracking Process

Submission of Request for Official Registration

Once a document template is ready for official use, the *Department Owner* must request for the template to be registered in the official repository and tracked in Airtable.

Requests may include:

- creation of a new template record
- update of an existing tracked template
- deprecation of an outdated template

When sending a request, include the following details in the email:

MARY SHARRI • DOCUMENTATION PORTFOLIO • NOT FOR DISTRIBUTION

- Template Title
- Brief Intended Purpose
- Department Name
- Template Type
  - General Document Template
  - Form Template
  - Checklist Template
  - Report Template
  - ISO-Related Template
- Target Users
  - Department Owners
  - Staff Members
  - Admin, etc.

Review and Registration

Upon receipt, the *Technical Writer* will create a ticket via Jira for tracking.

The document template will be registered via the Airtable form to get a Template ID and get it listed in the Airtable tracking library.

Template Tracking Library

Each template record should have the following information when opened in Airtable:

Field	Description
Template ID	Unique identifier assigned to the template
Template Title	Official template name
Department	Owning department
Template Type	Form, Checklist, Report, Tracker, etc.
Owner	Department owner or process owner
Status	Active, For Review, Deprecated, Archived
Repository Link	Link to the official template
Version	Current version number

MARY SHARRA · DOCUMENTATION PORTFOLIO · NOT FOR DISTRIBUTION

Last Updated Date	Most recent update
Notes	Additional remarks or usage notes

Template ID Format

Templates shall follow a standardized ID convention for traceability:

```
Department.TemplateType.Number
```

Format Type

Type	Code
General Template	GTMP
Form Template	FTM
Checklist Template	CTM
Report Template	RTM

Examples

```
PC.TMP.0001
FN.RTM.0002
ISO.CTM.0003
BI.FTM.0004
```

Storage and Repository

All officially approved templates must be stored in the designated official repository.

Only templates listed as **Active** in the AirTable Template Library should be used for official operational or QMS activities.

Deprecated or archived templates must remain accessible for reference but should no longer be used for new activities. These templates will be kept on a separate labelled folder within the repository.

Annual Review

Templates should undergo periodic review to determine whether they:

- remain active and applicable
- require updates
- should be deprecated or archived

MARY SHARIA . DOCUMENTATION PORTFOLIO . NOT FOR DISTRIBUTION

The department owner is responsible for confirming template relevance and accuracy during the review process.

> Document templates should undergo an annual review towards the fourth quarter, alongside the general document review, to determine which ones should be updated or archived.
